

ENVIRONMENTAL SUSTAINABILITY

Overlay Reception, Halifax Oak and White.

We're dedicated to being ethical and sustainable.

In line with our mission at Hawk Furniture, we're dedicated to being as ethical and sustainable as possible. We try to source our raw materials locally to keep our carbon footprint low and we genuinely believe we're one of the most eco-friendly manufacturers in the UK

Our selection of raw materials and our manufacturing processes are under constant review to ensure we continue to operate in an environmentally responsible manner, including the use of recycled materials where possible.

Here's a sneak peek into how we achieve this,, focused completely on offering you a fantastic range of office furniture that is both eco-friendly and made with ethics in mind.

POWERED BY THE SUN

Our factory roof is fitted with solar panels, supplying up to 100% of our power needs. Given the energy-intensive nature of furniture manufacturing, these panels are crucial to Hawk's net zero carbon initiative.

Every year our solar system logs a reduction in CO2 of 361t, an equivalent of planting 201 trees and a saving of 145t of standard coal.

BIOMASS BURNER

In addition to sourcing sustainable and certified board, we take extra measures to reduce our carbon footprint. Waste board is utilized to power our cutting-edge biomass burner, while larger off-cuts are repurposed for the core of our budget-friendly screens. This not only helps in offering competitively-priced desk screens but also contributes to warming our factory and powder-coating ovens, significantly cutting down on energy consumption.

SCOPE 1, 2 & 3 EMISSIONS

Scope 2 emissions of as little as 3.1kg per product manufactured*. Figures calculated based on 2022 usage and do not include reduction of energy that our second installation of solar panels provide (only installed in Summer 2024).

NOTES ON EMISSIONS

Scope 3 is estimated and not feasible to include as Hawk has very little control over the products once they are sold into the trade (emissions of the distributor, how far they travel to deliver and what happens at the product end of life).

*Taken as an average over all products sold in 2022, emissions are calculated from Normative Carbon Accounting Engine and include all available data. Where no such data exists, a calculated estimate has been substituted.

RESPONSIBLE MANUFACTURING

We endeavour to only source products from FSC® certified suppliers. FSC® certified timber products are available on request. (License Holder FSC®C199861).

OUR FLEET

Our company owned vehicles are all hybrid or electric (not inc lorries).

The mark of responsible forestry
FSC® C199861
